6. Maintenance

To make sure the Mini Hopper always works smoothly, we suggest you clean the internal parts of Mini Hopper regularly.

Please make sure Mini Hopper turns OFF before cleaning.

To clean the internal parts:

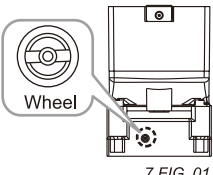

1. Remove the coin box.
2. Use a dry, soft cloth, or brush to clean internal parts and coin path.
3. Use a dry, soft cloth, or towel to clean the coin box

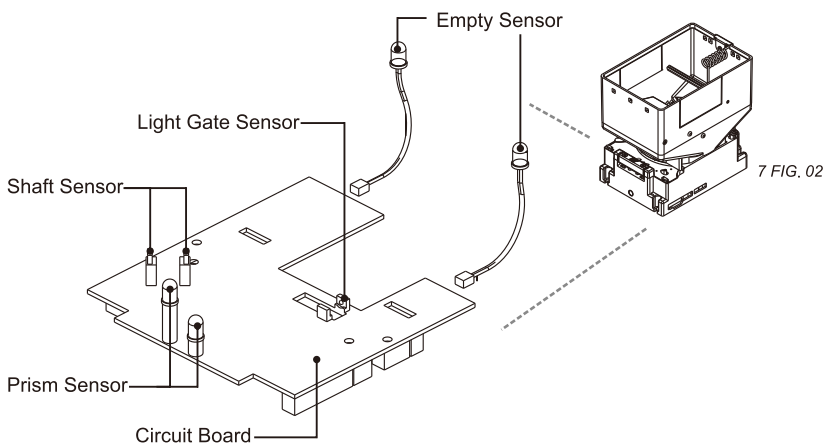

Maintenance Notice
(Any improper maintenance will result invalid warranty.)

Recommended	Mild, non-abrasive, soap water.
DO NOT USE	Organic solvent , Alcohol, Volatile liquid.

7. Troubleshooting

Flashes	Status	Corrective actions
1	1. Incorrect voltage 2. Coin jammed 3. Motor problem	1. Make sure the voltage is applied to Mini Hopper. 2. Clockwise turn the wheel which is in the back of Mini Hopper to remove the jammed coin and check the shaft-block. <div data-bbox="778 327 991 502">  <p>Wheel</p> <p>7 FIG. 01</p> </div>
2	Insufficient coins	Refill coins or Rester hopper
3	Double count detect	1. Re-adjust coin size and shaft. 2. Check the control signal refer to 5-2(P13). (After last credit signal output then PAYOUT_IN signal must stop in 12ms other wise may cause coin leak out.)
5	Prism sensor error	Inspect for foreign objects on prism sensor or jammed coins. (as 7 FIG.02)
6	Shaft sensor error
